Course Agenda

Introduction & Objectives

Leadership For The 2020's & Beyond

How has management and leadership changed from the last decade to present day? What skills do managers and leaders require to be the best now and in the future? How do you stack up against these key skills?

Role Modelling As A Manager

The example you set as a manager can have a profound effect on the morale, motivation and engagement of your team. How can you role model success for your team and your organisation?

Leading The Vision & The Strategy

By revisiting your own company vision and strategy, what can you do to encourage your people to follow the vision and strategy more coherently and passionately?

Leading In The Digital Age

With the 21st century bringing about the digital revolution, managers and leaders need to be well-versed in the key qualities required to manage and lead in this digital age. What are the essential leadership skills and how do you measure up against them?

Leading & Managing Remote Teams

With more and more employees securing flexible and agile working requests, and many organisations expanding into global regions through the digital age, modern-day managers and leaders will need to be effective at managing and leading digital, remote and global teams. Learn how to connect and engage with remote teams of all sizes and structures.

Lunch

Advanced Communication, Persuasion & Influencing Skills

Learn how to be a master communicator! Learn why it's not enough to just put your message across... it's just as important to understand the other person's point of view. The advanced manager has the skills and techniques to influence and persuade elegantly and with passion! You'll understand what makes others tick, how they process information, what their motivations and preferences are and then, armed with this knowledge, you'll know how to get the best out of them.

Improving Your Emotional Intelligence

A key skill that's needed by today's manager, and one that's vastly under-rated! Take a test to see how you measure up in the emotional intelligence stakes. Analyse why this is such an important skill to develop for the advanced manager.

Building Resilience

With so many employees experiencing a more intensive workload, with higher expectations and less time and resources to achieve these expectations, managers and team members alike are looking for ways to more effectively manage the stress and pressures they face in their roles. Learn how you can build and develop your own resilience skills, and how you can support others in developing resilience too.
